WHO WE ARE

M & Q Equipment (MQE) is a family-owned business with over 100 years of combined experience in the mining and quarrying industries. MQE is the proud owner of Austral Pumps since their acquisition in 1987. Austral Pumps have manufactured pumps and pump components in Australia for over 45 years.

MQE houses a specialist team of technical staff, including Engineers, Draftsman, and QA Managers. Our team are responsible for ensuring our products and services maintain the superior quality and standards our clients rely on. MQE periodically test our components with an independent testing body accredited by NATA. MQE has invested in research and development and manufacture components that have better wear qualities and superior service life.

MQE's range of Austral Pumps includes the full range of Slurry, Gravel, Dredge and Sump Pumps. We stock a full range of service components, along with components for Warman pumps. With over 10,000 fully interchangeable spare parts in stock, MQE is guaranteed to have the components you need, eliminating downtime and outages.

Our Head Office is centrally located in Richlands, Brisbane and houses our state of the art pump rebuild centre. Our efficient freight and breakdown service will have your plant operational, with minimal time lost to an outage.

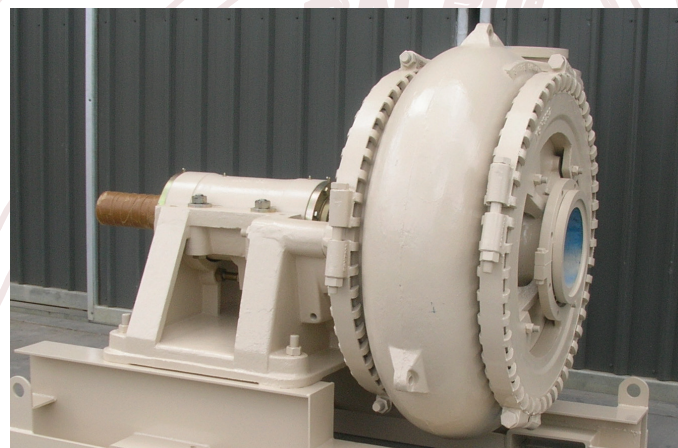

AUSTRAL SLURRY PUMPS

MQE manufactures and supplies Austral Slurry Pumps ranging in size from 1 x 3/4" through to 16 x 14". Our pumps can be manufactured to specification, customising components to best suit your site's range of requirements.

MQE's Research and Development team collaborate with our clients to produce exceptional wear components tailored to their requirements. Our liners, throat bushes, impellers and barrels are manufactured with our QA team ensuring the highest quality outcome. Our components are fully interchangeable with Warman pumps. With over 10,000 components in stock, we can meet your requirements and keep your business operational.

WHY REBUILD

Trade in your old pump with a new Austral pump and experience spares in stock at all times.

A brand new Austral slurry pump can be purchased cheaper than a major overhaul, saving your business time and money in the long-term. MQE can build your pump specifically for the slurry material your business handles.

AUSTRAL CANTILEVER SUMP PUMPS

MQE manufactures three types of Cantilever Sump Pumps. These come in different sizes to suit a variety of applications:

- **Medium Duty**
- **Heavy Duty**
- **Non-clogging Chokeless Pump**

Our range of Cantilever Sump Pumps is manufactured with non-submerged bearings to ensure maximum pump life. Our pumps are manufactured in both hard-wearing chrome alloy and rubber lined construction. Our Cantilever Sump pumps come in various leg lengths to suit all applications.

PUMP REBUILD FACILITY

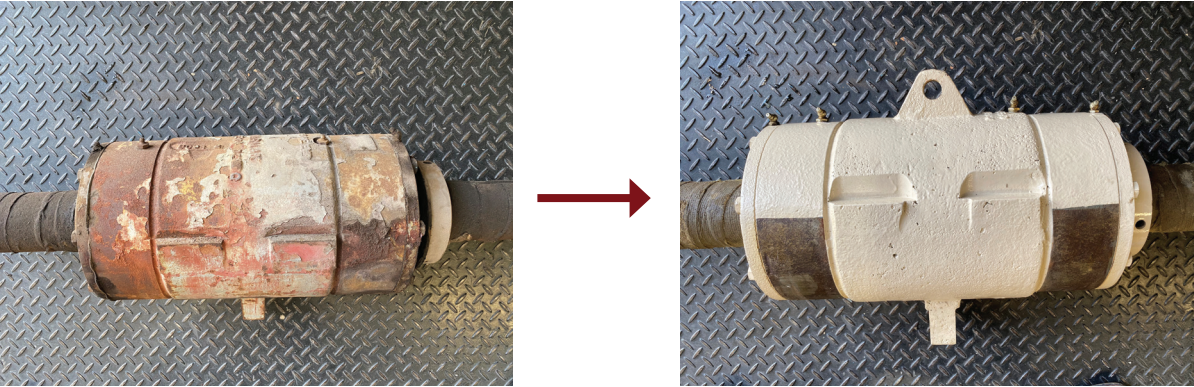

MQE's state of the art Pump Rebuild Facility has been purpose-built to service the needs of our client base. We service and refurbish all models of pumps from from 1 x 3/4" through to 16 x 14".

Our vast experience guarantees that your pumps will be rebuilt using quality components and assembled correctly, ensuring all tolerances are within specification. MQE's in-house Blast and Paint facility will have your pump looking like new. With a large range of components in stock at all times, MQE ensures minimal wait times on components when your plant is experiencing an outage or shut down. We work with our clients and proactively to ensure we carry adequate stock at all times.

We pride ourselves on creating reliability for our clients. Our technical team supplies advice on application sizing and alternative materials to ensure maximum pump life-cycle between refurbishments.

BEARING ASSEMBLY REFURBISHMENT

M & Q Equipment offers our clients a Bearing Assembly Refurbishment Service. Your bearing assembly will be fully refurbished, including all tolerances with factory specifications and the correct quantity of grease. We offer this as a Service Exchange or for you to send us your Bearing Assembly for reconditioning.

FROM THIS

TO THIS

SPARE PARTS

MQE stocks over 10,000 fully interchangeable pump components to suit Warman and Austral Slurry Pumps from 1 x 3/4” through to 16 x 14”.

We ask our new clients to send us a list of their pumps so we can price their wear components and show how we can save them on operational costs and plant downtime.

This also allows us to proactively plan for parts requirements, ensuring we hold stock to fulfil our clients’ requirements. On the rare occasion that we don’t stock a specific component, we can reverse engineer and manufacture components in-house.

Contact your MQE representative today to see how we can save your business on operational costs and reduce downtime for your business.

MECHANICAL SEAL CONVERSIONS

M & Q Equipment offers a range of Mechanical Seal Conversions to suit Warman and Austral pumps from 1 x 3/4” through to 16 x 14”.

Converting to Mechanical Seals has the following benefits:

- Day to day maintenance is reduced as our Mechanical Seals require minimal maintenance.
- Gland packing is no longer required.
- Pumps run more efficiently using less power to run and start.
- Bearing Assemblies are protected from contamination.
- No product leakage.

Contact our friendly staff to discuss the process of converting your pumps to Mechanical Seals.

USED & UNUSED WARMAN PUMPS AND PUMP COMPONENTS

We have the largest stock of used and unused Warman pumps and components in the world.

This includes pumps from 1 x 3/4” through to 16 x 14” in the following models:

- | | |
|-------|-----------|
| • AH | • M |
| • ASC | • SP |
| • AHF | • SPR |
